Good idea, Gary. Just don't forget to leave off the whitewalls!

Subject: Diesel or Taurus fr HF/VHF mobile??

I got a variety of responses for a car which would be good for 100 watts
or so of HF and 50 or so of 2 meter and 440 radio. Criteria were lack of
interference from car into receiver and from transmitter into auto
electronics.

Diesels and the Taurus were among those favored. Anyone else have comments
on these choices.

Tnx agn Bob

SS-->I'm looking for a program like "Packet tracker" for the Mac, but one that

I too would like to have such a program. If you find one, would you let

me know where. I will keep a eye out for one and let you know if I find one.

The third party rules are very strict in the UK, you have special Mailboxes and special club callsigns to pass 3P traffic
